

## Kaed Dwaber - Vic

Hi I am Kaed!

I am 20, and live in Melbourne with my family. I have achondroplasia, the most common form of short stature.

I am at university studying global studies. I have had a great number of surgeries. Although these surgeries have led to difficulties in undertaking everyday tasks, I do not let it control my life, instead I seek new opportunities to do things differently.

I have a keen interest in politics, I enjoy playing badminton both socially and competitively.

I wanted to be part of the mentor program because growing up, I had people there to support me during difficult times, I would like to help others who may be experiencing similar situations.
