

# Lucia Bruce-Gilchrist - NSW

Hi I'm Lucia!

I'm 18, and live in Sydney with my family.

I have just started studying two degrees at Uni, a Bachelor of Arts and Master of Nursing. I would love to travel around the world. My type of short-stature is Achondroplasia. I have been with the SSPA for most of my life, and love attending the conventions and sporting weekends.

I am very friendly and social, and always ready for a chat with a friend or someone new.

My skills and interests include athletics and I regularly compete at state and national competitions, I also do a bit of competitive swimming. I like acting and was the drama prefect at my school in year 11. I play the violin and piano for fun, and love to listen to music.

I was attracted to be a mentor because it is something that I would have loved to have had established when I was younger. I found people within the SSPA who I could go to when I was experiencing troubles. I want to help others get through their own internal and external struggles related to their short stature, and maybe even prevent them from experiencing them in general.
