

Taneya Shannen - QLD

Hi I'm Taneya,

I'm 27 born and raised in Rockhampton, Central Queensland. I am the third child of four girls and the only one in my family with achondroplasia.

I live relatively independently. I have had four major surgeries; therefore, I maintain regular physio and a healthy lifestyle.

My interests include travelling and meeting new people, watching rugby league games and spending time with family and friends. I enjoy attending LP conventions, both national and international.

Growing up I found many of the SSPA members to be great role models and mentors and I would find it very rewarding to support our young people through their own journey as they grow up in today's society.
